Construction

Confectionery

Bakery

Packaging

Agriculture

Inspection

- Global construction industry is expected to record a CAGR of 6.5% to reach US\$ 10,835.6 billion by 2023
- The Rebuilding of Karabakh is a priority for Azerbaijan, which includes the construction of a huge amount of residential, social and industrial buildings.

The only way to meet such high demand is to implement precast concrete technologies.

- Advantages of precast technologies
 - High quality of construction materials
 - High speed of construction erection
 - Less materials/labor and financial cost
 - Environment friendly
- **Industrial Solutions** and partners offering fully automated, high productivity plants for production of any kind and size of concrete construction materials, from paving stones and construction blocks up to hallow core slabs and massive wall panels

- Chocolate, caramel, fondant, marmalade, cookies, wafers, halva and many other sweets

Do you feel test of childhood?

- **Industrial Solutions** and partners provide state of art technologies for confectionery industry **from**
 - Chocolate preparation
 - Caramel, jelly, fondant and other ingredients cooking
 - Raw materials processing**through**
 - All kind of confectionery products forming and filling
 - Wafer and cookies forming, filling and baking**ending by**
 - Enrobing
 - Decorating
 - Packing (individual, group, bundle)

- Bread is one of the oldest (evidence from 30,000 years) prepared foods, having been of significant importance since the dawn of agriculture, and plays an essential role in both religious rituals and secular culture.

Bread is the staff of life (Proverb)

- Companies we are working with are able to design, supply and build modern bakeries using modern technologies in this industry:
 - Storage, preparing and dosing main components of the dough
 - Dough mixing – dough has to be mixed to accelerate chemical process inside
 - Dough pieces forming (cutting and rounding)
 - Proofing – improves quality of dough and final product - bread
 - Baking – is the most sensitive part of bakery
 - Cooling – bread has to be cooled before further using
 - Slicing and Packing – is good to be ready to eat product protected from environment

- Packaging is important to store and transport of the product and increases shelf life and provides attractive view.

We can pack any type of product into any type of compatible packaging!

- Machines and lines manufactured by our partners can pack
 - Liquid, viscous, powder, granulated, hard particles, irregular forms and size
 - Food, chemical, pharmaceuticals, cosmetic products**weight of**
 - From 15 gr up to 1,000 kg**in to**
 - Stick pack and sachet, all type of vertical filling and closing, glass and plastic bottles, jar and cans, boxes and sags**also**
 - Primary and secondary packaging, palletizing
 - Plastic bottles blowing and box erecting

- While fruits and vegetables go from field to our tables they pass many stages of handling and processing we can organize, optimize and improve.

To keep freshness and taste of products in their long travel!

- We start from receiving products after harvest:
 - Cleaning and washing, Sorting, by color, size and weight
 - Packaging for storage and storing (cold storages, CA/ULO)
- We process fruits and vegetables
 - Dehydration and freezing
 - Producing juices, puree, concentrates
 - Pasteurization and aseptic filling
 - Baking and roasting (nuts, hazelnut, almond etc.)
- We process milk and meat, produce dairy and meat products

- One of the main components of the food production is quality control, food safety and inspection during the production and final product.

Quality control in food process and production is key!

- Solutions for hygiene and disinfection
 - Steam cleaning and washing of conveyor belts
 - UV (ultraviolet) disinfection of water, air and surfaces
- Raw materials and final product inspection
 - Checkweighers
 - Metal Detectors
 - Visual Control
 - X-ray Inspection
- Labeling
